(DRAFT AGENDA October 2, 2024)

IRRIGATION LEADER magazine, is sponsoring our 12th annual “*Irrigation Leaders Workshop*”. This year’s theme “Efficiency” will focus on doing more with fewer people and simply finding better solutions requiring reduced time. Additionally, we will look at specialized equipment and software solutions. How do successful managers manage their time? What are the best chain-of-command structures within an irrigation district? Technologies and methods of some of our international friends will be discussed. The purpose of the workshop is to provide an opportunity for general managers and directors of irrigation districts to discuss ideas and learn from each other on a variety of district operations- and management-related issues, and to build out-of-state working relationships.
